

INSTALLATION GUIDE- SYNTHETIC CEILING & WALL

Good World Company

High Performance.
Low Maintenance.

Good World Company: Synthetic Ceiling & Wall Panels

Indoor & Outdoor Panelling is made from Non-Toxic, UV-tested Materials. Fully Water resistant and insensitive to the sun.

Equally at home by the pool or in a kitchen, bathroom or garden, Synthetic Ceiling and Wall can be hosed down without fear of rotting.

This can be easily installed with basic carpentry tools.

GWC Synthetic Ceiling & Wall can be installed with basic carpentry tools, available in conveniently custom sized woven panels.

panels available in 4'x 8' or 121.92cm x 243.84cm sheets. longer lengths available by special order.

woven

available to be installed with hard surfaces such as oriented strand board.

Installation:

- May be cut, trimmed or drilled using ordinary power or hand tools.
- Panels can be fastened pneumatically using staples gun (nail).
- Ring nails or staples in wood or use suitable screws.
- Dust mask is recommended, fine dust is created when cutting. Its that simple and looks good too.
