

COMMUNITY:

Education is a tool to fight against all the odds

We at GWC supports "Fundación crece conmigo" & "Vision Mundial".

Crece Conmigo: kindergarten & school for five months to five years old children. The school is located in a low-income area of San Jose, Costa Rica.

These children come mostly from teen and single mothers. The school stimulates the children in the cognitive & effective areas to achieve an integral development of the child, permitting the mothers to work.

Visión Mundial: identifies a child in-need and find a sponsor to help the child to study and train themselves in this competitive world. Again the motive is to educate the children to make them independent and reach new heights.
